RUMBLING BRIDGE NURSERY
DOUBLE AURICULAS
AND PRIMULA 'KUSUM KRISHNA'

In 1997, we started on a quest to produce a vastly superior strain of double Auriculas, to offer for sale.

Until now, all that were available commercially were poor quality cultivars, unable to hold aloft a full head of flowers without stalks bending, and with an inconsistent flowering habit each season.

Not only have we rectified the faults mentioned, but we have bred exciting new colours too. To view the plants named below, have a look at the 'projects' page on our website - www.rumblingsbridgenursery.co.uk

<i>Auricula 'Shaun' R</i>	Short stalks of golden yellow, scented blooms, set off against wonderful farina dusted foliage.
<i>Auricula 'Pumpkin' R</i>	The first, and closest to an orange-yellow colour flower for an Auricula. Flowers deepen to orange soon after opening. Attractive, rounded leaves
<i>Auricula 'Late Romantic' R</i>	The latest flowering Auricula we have ever seen. Short stalks of pale peach, rose-like blooms with delicate scent. Late May and repeating late summer.
<i>Auricula 'Cameo' R</i>	Good sized, creamy-buff colour on strong, 4" stems. A heavy flowering cultivar, which ages to a violet edge.
<i>Auricula 'Black Jack' R</i>	Double mahogany red flowers, held on very short stems close to dish of silvery powdered leaves. Our first double hybrid.
<i>Primula 'Kusum Krishna'</i>	A unique plant for quality. Large, deep indigo, scented blooms above round, wavy edged leaves, piped in silvery powder. Now a firm favourite with the alpine enthusiasts.
